

RE-SOURCE

The main objective of this project is carried out by three separate research areas, Irrigation Water Management, Codes of Good Agricultural Practices and Soil Erosion Risk Management. The above are implemented on the Re-source program, partner countries: Greece, Cyprus, Bulgaria, Albania and the Republic of North Macedonia.

Farm School of Aristotle University, Thessaloniki, Thursday 25th July
2019

The meeting has been organized by the Interbalkan Environment Center. There were participants from the majority of partner countries of the Resource program.

The main topics presented by the participants were about the way in which each partner's workplace operated, their research interests and their main projects. Also, budget, duration, deadlines, partner obligations and the main objectives of the project were fully analyzed and explained. In the end, I-BEC the lead partner, distributed the Overall Partnership Agreement which has been signed by all partners.

**The beginning of something great,
Kick off meeting moments!**

«Providing services for management of natural resources» of the European Territorial Cooperation Programme «(INTERREG V-B) Balkan - Mediterranean 2014 2020»
